# Program Summaries

## **ACES International Horticulture Products**

This year's faculty-led study trip will provide experiential learning in Morocco to expose students to the intricacies of the international horticulture industry. Morocco is the most diverse of any African country, culturally, ethnically and agriculturally, due to the Mediterranean climate. Students will experience citrus, olives, and more! Past International HORT Programs have gone to Guatemala, Costa Rica and New Zealand.

## **ACES/BUS International Business Immersion Program**

This 2-week program puts students in the shoes of a global executive as they walk through a marketing channel. Three components comprise the IBIP experience: a preparatory course during Spring semester; a 14-day immersion tour allowing students to view and understand the issues they've studied; and a public, on-campus presentation and video screening of the group's research findings during the fall semester. Location of the program rotates each year between Europe, China and Brazil.

## **ACES Study & Intern in France: EI Purpan**

This program in the south of France involves 1 month of courses studying French language as well as viticulture and enology. The second month of the program, students participate in an internship on a French vineyard, dairy or other agricultural site while living with a host family. There is also a semester program at Purpan with a French language requirement.

## **ACES in Brazil at University of Viçosa**

This program, offered in summer or full semester, located north of Rio de Janeiro. There are a variety of academic programs in which to enroll as well as internship and research opportunities. The semester program requires at least 1-2 semesters of Portuguese language while the summer program does not require Portuguese. In both programs students will study Portuguese.

## **ACES in Greece at American Farm School**

The Dimitris Perrotis College of Agricultural Studies in Thessaloniki, Greece, offers a six-week program that fuses practical, hands-on agricultural work experience with a unique introduction to the culture and traditions of Greece. The program includes classroom and fieldwork exploration of the dynamic and varied world of Greek agriculture and food industry, as well as exposure to daily life in Greece. There is also a semester program available.

## **IAGE Food and Culture in Rome**

The Food and Culture in Rome program focuses on the critical study of culture, systems and politics of food in Italy. The program is offered during the summer or semester-long. Each term will have unique elements. Fall semester focuses on food production with hands-on experiences in regional farms and wineries.

## **ACES in Ireland at University College Dublin**

UCD is the largest university in Ireland and a great destination for ACES students. A wide variety of courses are offered including crop production, plant pathology, soil science, nursery management and more. This is a competitive program that requires a GPA of at least 3.25.

## **ACES in the Netherlands at WUR in Wageningen**

Wageningen University and Research Centre is one of the leading and most internationalized universities in Europe, located about an hour south of Utrecht. The language of instruction in many courses is English. It is an ideal site for students interested in crop science and environmental science.

## **ACES in New Zealand at Massey University**

Massey is New Zealand's premiere institution for the life sciences and agriculture. The city of Palmerston North is conveniently close to west coast beaches, and within easy driving distance to the Hawke's Bay wine region, skiing and snowboarding at Mt. Ruapehu, and New Zealand's capital city, Wellington. A summer study tour is offered with an internship in Hawke's Bay or students can study at Massey for an entire semester.
