# Program Summaries

## FACULTY-LED PROGRAMS

### **ACES International Horticulture Products**

This year's faculty-led study trip will provide experiential learning in Morocco to expose students to the intricacies of the international horticulture industry. Morocco is the most diverse of any African country, culturally, ethnically and agriculturally, due to the Mediterranean climate. Students will experience citrus, olives, and more! Past International HORT Programs have gone to Guatemala, Costa Rica and New Zealand.

### **ACES/BUS International Business Immersion Program**

This 2-week program puts students in the shoes of a global executive as they walk through a marketing channel. Three components comprise the IBIP experience: a preparatory course during Spring semester; a 14-day immersion tour allowing students to view and understand the issues they've studied; and a public, on-campus presentation and video screening of the group's research findings during the fall semester. Location of the program rotates each year between Europe, China and Brazil.

## SUMMER PROGRAMS

### **ACES Study & Intern in France: EI Purpan**

This program in the south of France involves 1 month of courses studying French language as well as viticulture and enology. The second month of the program, students participate in an internship on a French vineyard, dairy or other agricultural site while living with a host family. There is also a semester program at Purpan with a French language requirement.

## SEMESTER PROGRAMS

### **IAGE Food and Culture in Rome**

The Food and Culture in Rome program focuses on the critical study of culture, systems and politics of food in Italy. The program is offered during the summer or semester-long. Each term will have unique elements. Fall semester focuses on food marketing and business, while the spring semester program offers courses in food and media. There is also a shorter, summer program.

### **ACES in Ireland at University College Dublin**

UCD is the largest university in Ireland and a great destination for ACES students. A wide variety of courses are offered including crop production, plant pathology, soil science, nursery management and more. This is a competitive program that requires a GPA of at least 3.00.

### **ACES Study & Intern in South Africa, Cape Town**

This program in South Africa provides students the opportunity to study and intern in Cape Town. Coursework at the University of Western Cape provides the foundation for understanding historical and contemporary South Africa. Students will enroll in 2 courses at UWC, and internship course and complete an internship placement throughout the semester. Students will not only gain an understanding of current affairs in South Africa, but also valuable professional experience. This program is available for the spring semester and is open to all majors.

### **ACES in New Zealand at Massey University**

Massey is New Zealand's premiere institution for the life sciences and agriculture. The city of Palmerston North is conveniently close to west coast beaches, and within easy driving distance to the Hawke's Bay wine region, skiing and snowboarding at Mt. Ruapehu, and New Zealand's capital city, Wellington. A summer study tour is offered with an internship in Hawke's Bay or students can study at Massey for an entire semester.
